

LIGHT AT HOME IN PHILIPPINES

First acciona.org action in the Philippines is **Light at Home El Nido** pilot project, which **benefits more than 550 people** with access to renewable, reliable and affordable electricity in partnership with the Ayala Foundation.

Satisfaction

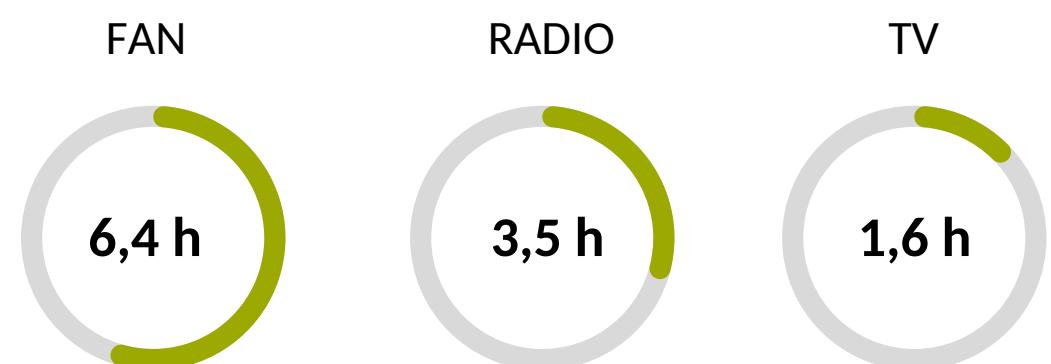

At least **96%** of people benefited:

- ✓ They are **happy** with the system and the service.
- ✓ They consider the contribution is **convenient**.
- ✓ They **recommend** Light at Home to another person.
- ✓ They consider that the service has **enhanced their lives**

New uses of electricity

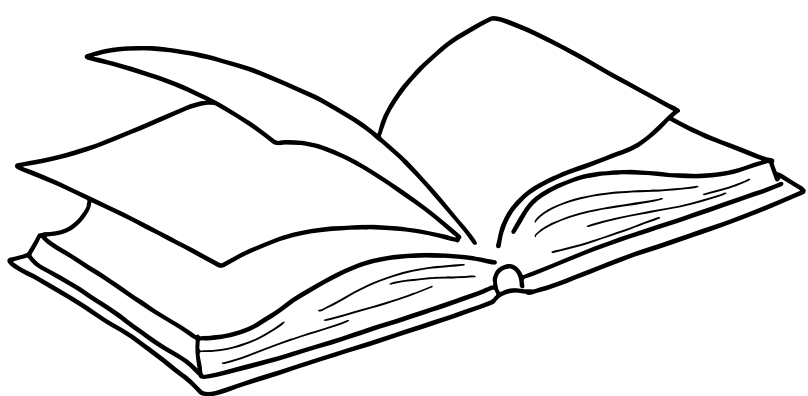

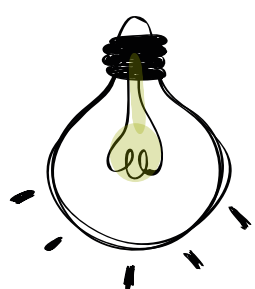

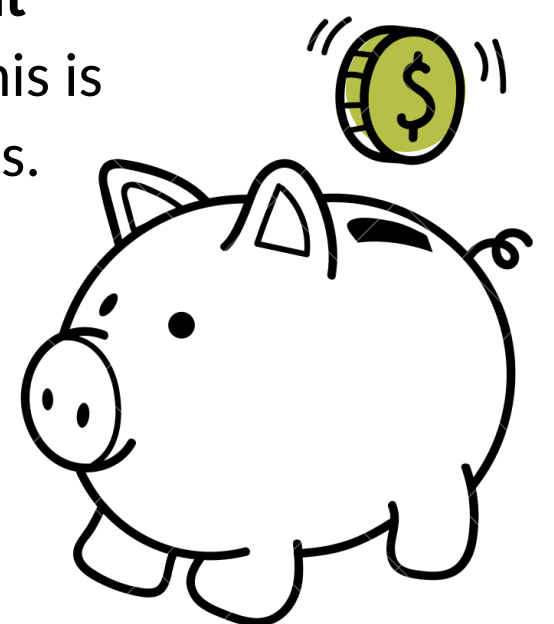

The beneficiary households have **more than 10 hours of lighting** per day and, in addition, use the electricity to connect:

Savings and income

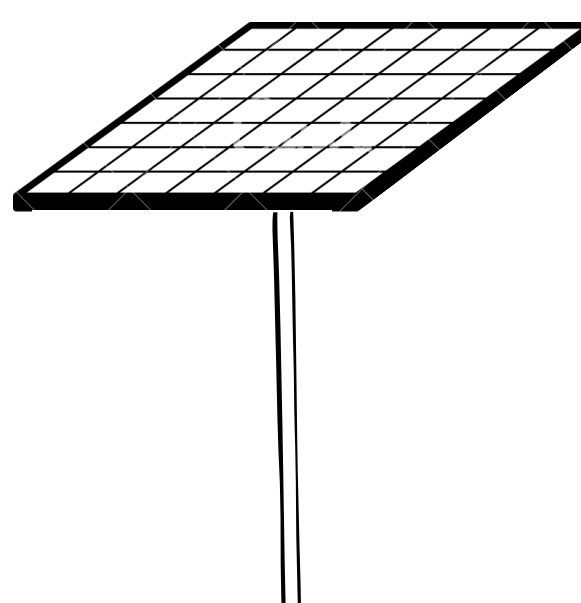

Benefited people contribute to the electric service with a **maintenance contribution that 97% consider consistent with the service**. This is lower than their previous energy alternatives.

In addition, **14% have a business benefited** with our systems and now have been increased their incomes in **95 USD more per month**.

More study time

Children with system in their households, study more time. **Female** children spend **2,30 h** on average per day and **male** children **2 hours**.

Efficient support

At least **95%** of the beneficiaries consider:

- ✓ Simple system installation and easy activation of the service.
- ✓ Good user service centers.
